

# Getting started with Vevox (Student Guide)

Vevox is a web-based classroom response system that enables you to vote on questions shown by your tutor in-class using your phone, tablet or laptop.

You can go to [Vevox.app](https://vevox.app) in your web browser, either on your phone, laptop or tablet. Or you can download the 'Vevox' app from your app store.

Once you are on Vevox.app, you will need to enter the 9-digit Session ID that will be given to you by the presenter/lecturer/meeting host.

## Navigating your Vevox session

In the following video Izzy from Vevox walks you through what it looks like from a participants point of view, from different poll types to Q&A.
